National Parks

Exhilarating days...

Québec maritime is home to several parks that are part of the Parks Québec network, which protects unique natural resources in this region. The Saguenay Fjord, the cliffs of Miguasha (a UNESCO World Heritage Site), the Chic-Choc Mountains and the Bic Islands are among the highlights of these parks. On foot or by boat, alone or with a guide, explore these fantastic sites and appreciate their rich natural heritage and exceptional beauty.

The Whale Route

The Whale Route: A unique scenic route

Manicouagan is a land of giants: the immense St. Lawrence, which stretches from Tadoussac to Baie-Trinité; the Saguenay Fjord and its steep cliffs; Manic-5, the largest dam of its kind in the world; vast forests; not to mention the whales! In Baie-Comeau, the retreating glaciers left their mark on the landscape at the end of the last ice age. The Jardin des glaciers (Garden of the Glaciers) recounts these events in a spectacular multimedia show and on sites that are unique in the world.

The Whale Route

A remarkable region

The Duplessis region covers an immense wilderness area that encompasses unique attractions such as the Sept-Îles Archipelago, Minganie and Anticosti Island. The Whale Route follows the St. Lawrence through a string of Acadian and Innu villages all the way to Natashquan; from there, only a plane or cargo ship can take you to the remote Lower North Shore. Get ready for a complete change of pace and scenery!
